

Investment Management Company Comprehensive Design Support

Reinforcing FinTech specialists with
efficiently built, relevant solutions.

Impact on Business

We needed to keep the impact on our users' daily work at the lowest level possible.

By direct cooperation between designers and engineers, and adapting research methods to already acquired end-users, we become partners, not distractors.

Building new tools that are user-oriented, with design practices and cohesive branding in mind, increased the expertise value of created solutions and created trust value in customers.

We spread awareness and trust in design processes by being able to work with technical specialists and provide implementable and scalable interface solutions.

Each new project starts more efficiently thanks to a systematized buildup process that keeps the interface language consistent.

Scalable and implemented, ready-to-use design system, accelerated conceptual work and implementation process. Logo creation support, implemented across multiple company units, allowed to keep new ideas consistent and familiar to everyone.

About the Customer

Man Group is focused on delivering alpha and portfolio solutions for customers. The firm invests across a diverse range of strategies and asset classes, with a mix of long-only and alternative strategies run on a discretionary and quantitative basis, across liquid and private markets.

Business Needs

Search for an effective way to streamline the process of building up new solutions and improving the current ones.

We created a number of new projects and improved the user interface quality and experiences of the existing ones.

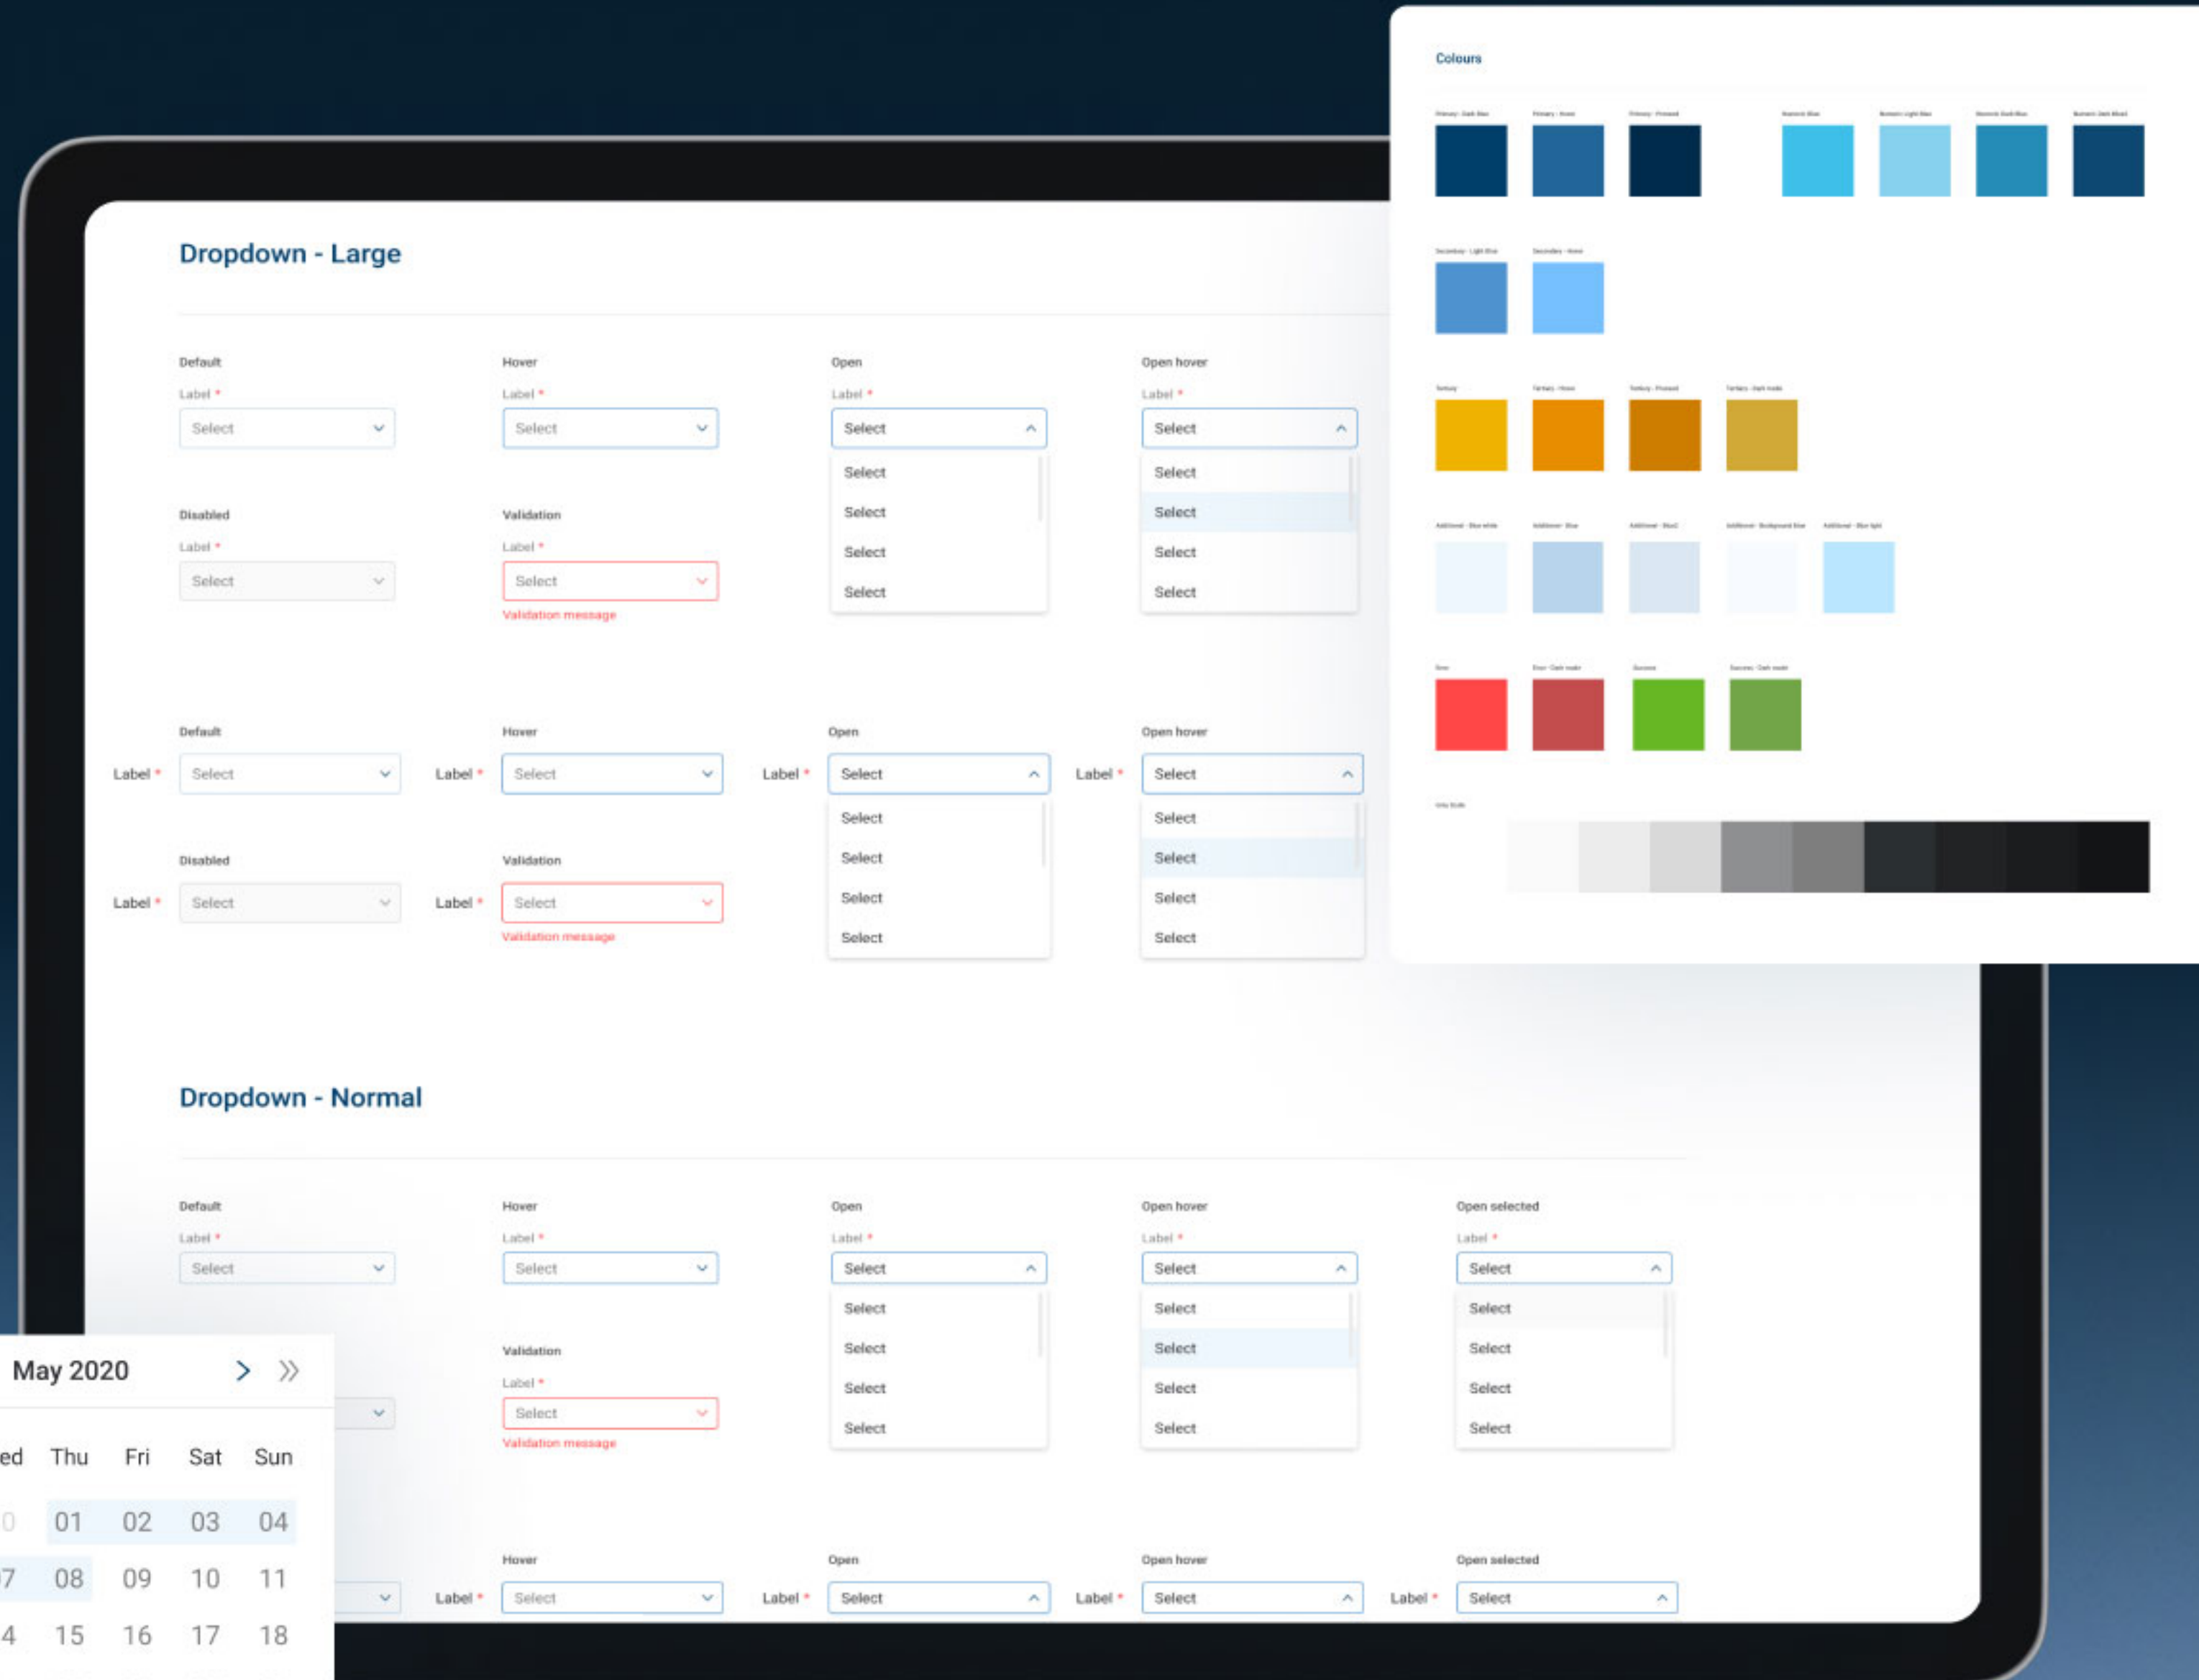

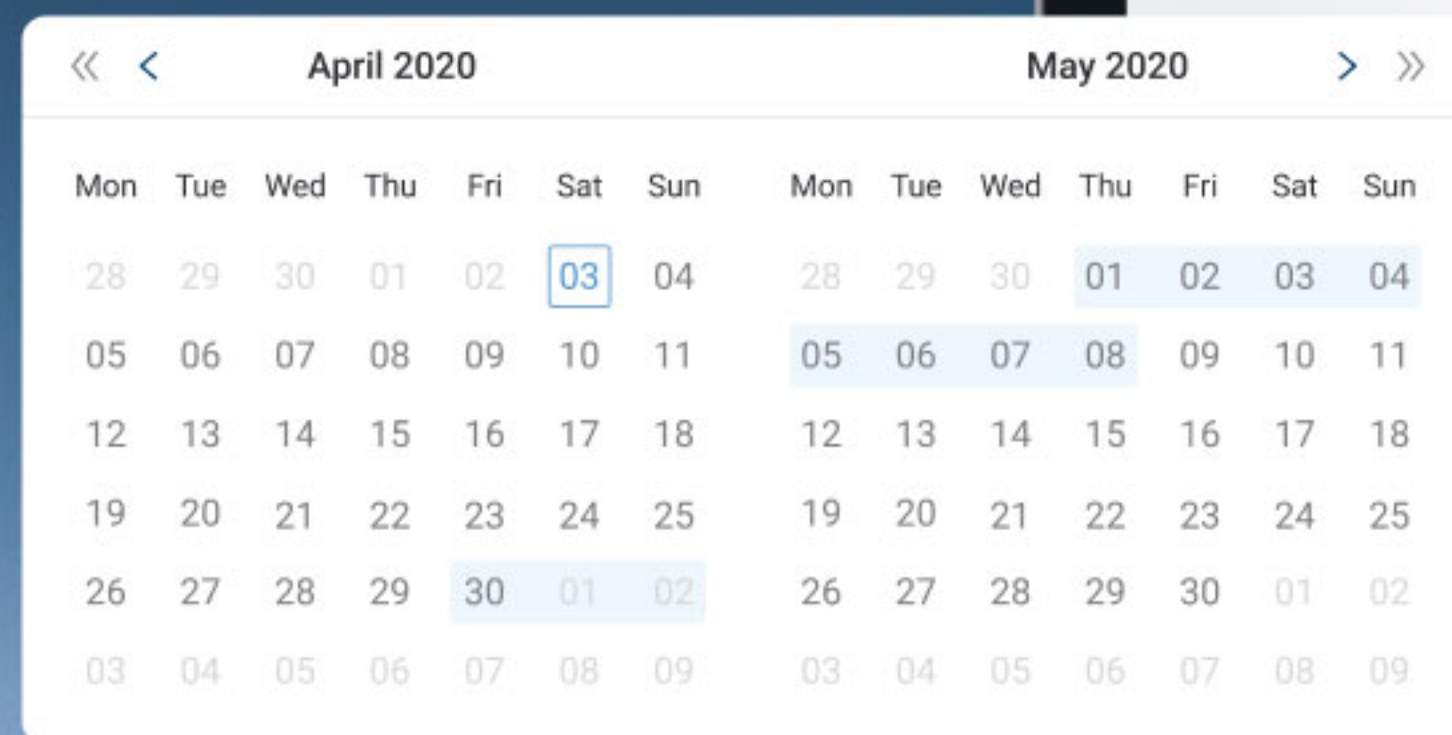

A need to increase specialists' efficiency by removing information noise.

We created a comprehensive data visualization that helped them avoid errors and inaccuracies, and improved their decision-making capabilities.

Design unification
consolidating interface
solutions across all projects
and keeping them unified at
all branches.

We used our experience to design
and implement a Design System and
provided branding support by designing
logotypes for new tools and initiatives.

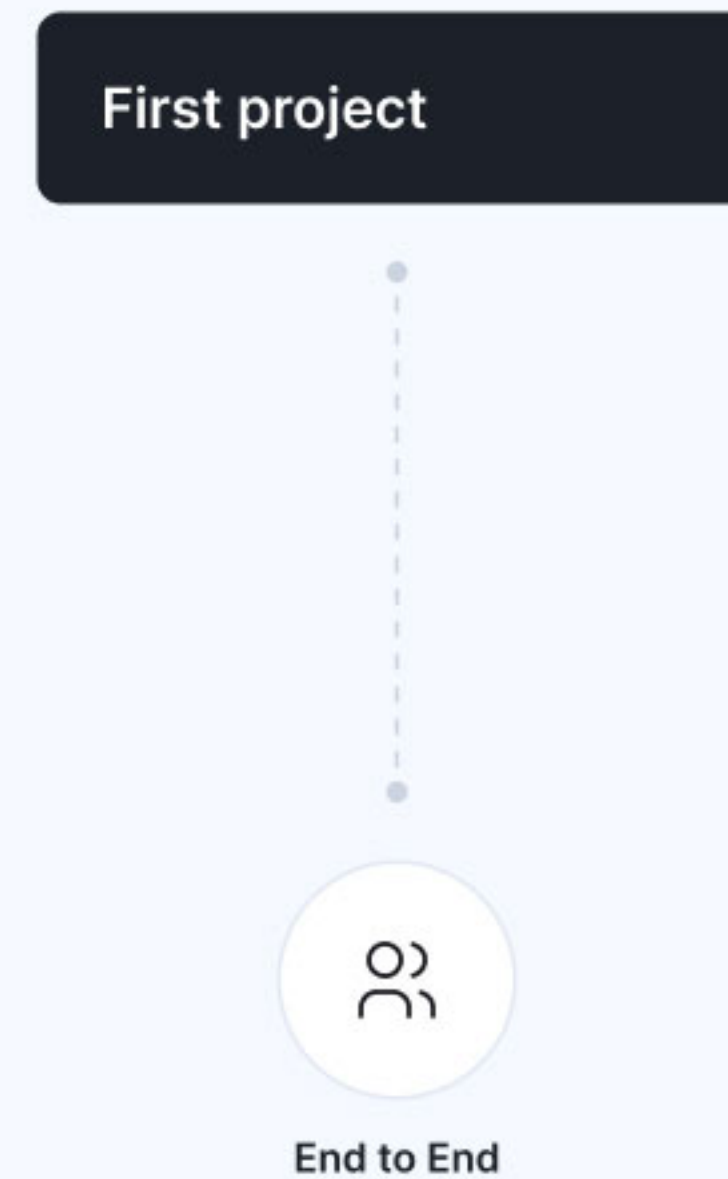

Team Structure

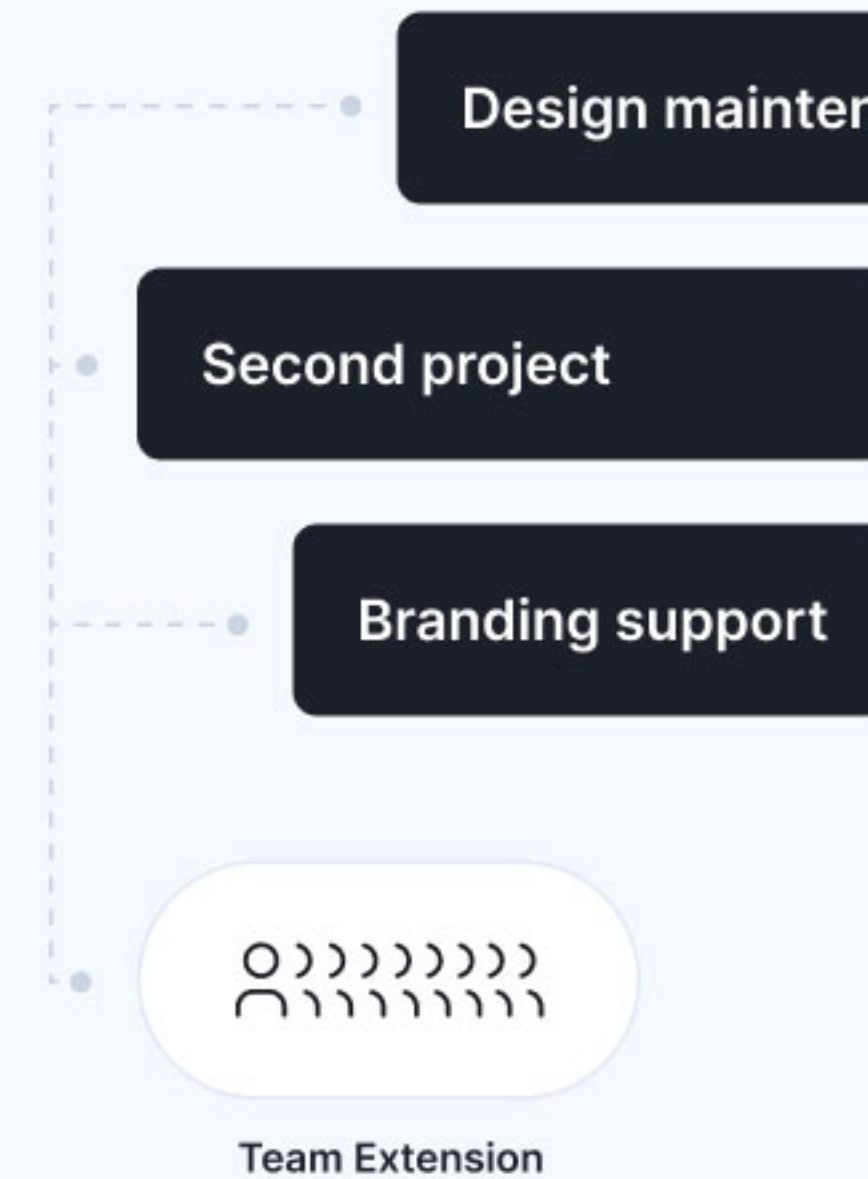

Cooperation that launched with one brand new project and a dedicated team, has evolved into multiple years of partnership.

Design support started covering not only end-to-end solutions but also already existing project improvements and more task-oriented initiatives.

Massive data

Extra Large Screens

Visualizing data through interactive dashboards allowed us to monitor performance indicators and identify trends and anomalies that require further investigation. Working on massive data sets in a decision-making context requires a lot of operational space. Each project had a specific viewport from a big screen monitor to even larger data displays.
